

SUSTAINABILITY CERTIFICATION BY EUROCERT & ISCC

Eurocert, a Greek Certification Body with presence in over 40 countries, is recognized by ISCC, an approved EU RED scheme since 2013, for providing certification, according to the schemes of ISCC EU and ISCC Plus.

ISCC EU

Certification according to ISCC EU covers the entire supply chain of biofuels. In particular, the following elements may get certified:

- Farms
- Warehouses
- Collecting points
- First Gathering Points
- Conversion units and biodiesel plants
- Traders

Certification according to ISCC EU means certification of biofuel or bioenergy based on specific sustainability requirements. Certification conforms to the requirements of Renewable Energy Directive (RED II), EU 2018/2001.

These biofuels may be of:

- Agricultural origin
- Animal origin
- Biological origin, waste and residues, e.g. used cooking oil, animal fats, fish oil etc.

The basic parameters for certification are:

- Sustainability requirements for primary production
- Traceability and mass balance
- Calculation of Greenhouse Gas Emissions

BENEFITS OF IMPLEMENTATION AND CERTIFICATION

The most important benefits of ISCC EU certification are the following:

- Compliance with the requirements of Renewable Energy Directive (RED II), EU 2018/2001 & 2009/30/EK (FQD)
- Improvement of company's logistics and stock organization
- Possible sale of certified biofuel in higher prices
- Company's certificate is uploaded on ISCC's world database
- Sustainability is enhanced and promoted throughout the supply chain

ISCC PLUS

More materials are covered under ISCC Plus Scheme:

- Mixed Plastic Waste
- End-of-life tyres
- Waste textiles
- CO₂ (post-industrial)

Audit procedures and basic certification parameters (as stated above) remain the same as ISCC EU. However, ISCC Plus is an optional certification scheme.

WHY CERTIFY WITH EUROCERT

EUROCERT is a Greek Independent Certification Body accredited by Greek and International Accreditation Bodies with activity in more than 40 countries globally.

EUROCERT 's team consists of highly-trained and educated auditors with great expertise and experience in their field.

EUROCERT is the first Greek certification body having gained approval by ISCC for biofuel certification according to ISCC EU implementing 2009/28/EC requirements. Furthermore, EUROCERT has a great experience in verification of Greenhouse Gas Emissions, being accredited by ESYD since 2005 for verification of EU-ETS GHG emission reports.

Certification by Eurocert means evaluation and acceptance by an accredited and well-respected third-party professional organization.

WHAT IS THE CERTIFICATION PROCEDURE

The basic steps for certification are the following:

- Apply for ISCC certification to EUROCERT
- Sign the ISCC certification contract with EUROCERT
- Registration of company name in the ISCC register
- Documentation review by EUROCERT
- Conduct of audit by EUROCERT
- Issue of certificate (annual duration) & uploading of company name on ISCC's world database
- Use of logo and certificate in sustainable material delivery notes

Details about the Implementation of ISCC can be found in:
