Railway Certification

Periklis Kokkalis-Melas

pkokkalis-melas@eurocert.gr

Eurocert as a Notified Body

Eurocert is accredited and notified according to the European Directive of Interoperability 2016/797/EU regarding all subsystems and constituents as well as all the available independent TSIs.

- Infrastructure
- Energy
- Rolling stock
- Control Command and signaling

NB 1128

NoBo

Eurocert as a Designated Body for Greece

Eurocert is Designated by the ministry of Transport and Infrastructure to inspect and certify all TSI open points of structural subsystems and all rolling stock wishing to enter the Greek network.

Eurocert Plans to be recognized as a DEBO in Romania and Bulgaria within 2021 ...

DeBo

Eurocert as an Assessment Body according to European Regulation 402/2013

ASBo

The European Commission Common Safety Method (CSM-REA) on Risk Evaluation and Assessment Regulation (352/2009 repealed by 402/2013 (as amended 2015/1136)), provides a legal obligation and mandatory framework for the evaluation and assessment of risk associated with significant changes to the EU railway.

Eurocert is the only Greek accredited certification body according to EU Regulation 402/2013. Eurocert's scope includes all structural subsystems and all possible "changes" initiated by the "proposer"

Eurocert as an Independent Safety Assessment Body according to EN 50126 EN 50128 EN 50129

Eurocert offers a full spectrum of ISA related services including the overall assessment of Generic Products (GP), Generic Applications (GA) and Specific Applications (SA). Also Eurocert offers certification of railway components and systems according to the required SIL.

SIL Certification

Eurocert can assess your product and certify its suitability for SIL 1,2,3,4 applications depending on your requirement.

ISA

Accreditation & approvals
